

The Social Club for
Columbia's Coffee Nerds!

COLA COFFEE CLUB

What is the Cola Coffee Club?

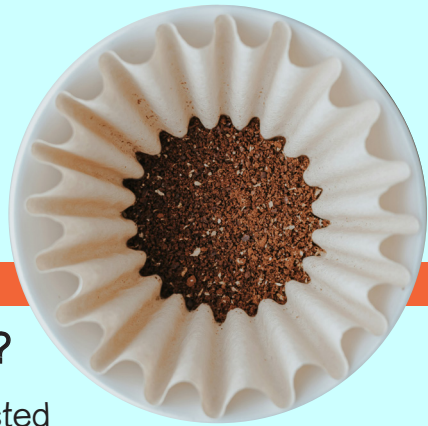

The Cola Coffee Club is a social group for coffee lovers who enjoy discovering the best coffee shops and roasters based in Columbia, South Carolina. Every two weeks, we visit different independent coffee shops, sampling unique brews, meeting passionate baristas, and learning about what makes each spot special.

We established the club to celebrate and explore the coffee culture in the heart of SC!

The three pillars of the Cola Coffee Club focus on human connection, progress to sustainability and supporting our local businesses. We hope to bring together people of all ages and backgrounds who

appreciate good conversation as much as good coffee.

What is “Specialty Coffee”?

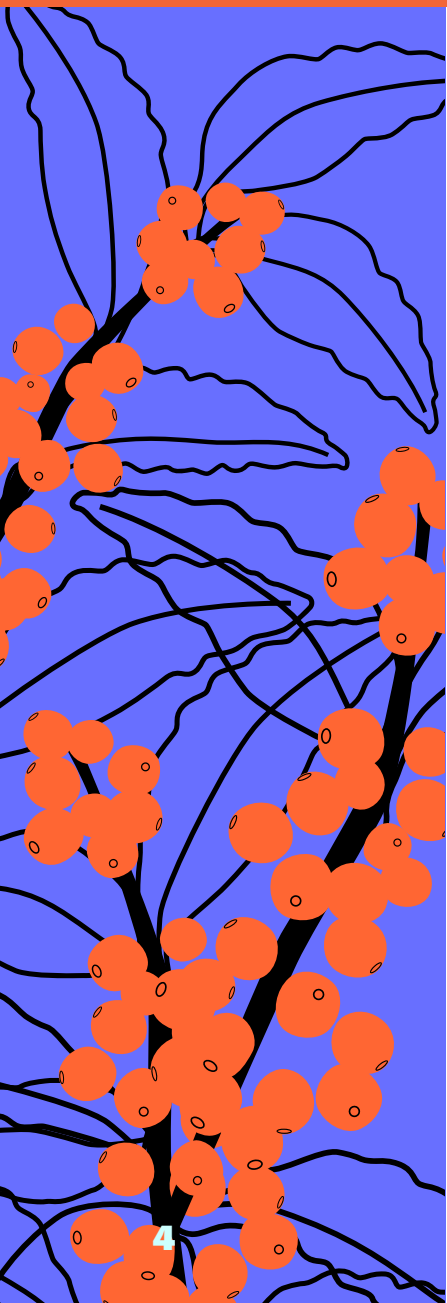

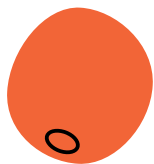

Specialty coffee is defined by the Specialty Coffee Association (SCA) as *a coffee or coffee experience that is recognized for its distinctive attributes, resulting in a higher value within the marketplace.*

The **quality** in specialty coffee refers to the combination of beans that are carefully grown, harvested, and roasted with attention to flavor and sustainability. These beans are often sourced from single farms or regions,

roasted in small batches, and brewed with care to highlight unique tasting notes.

Another phrase you might hear among coffee nerds is *third wave coffee*; third wave coffee is a movement that treats coffee more like a fine wine or craft beer - the concept focuses on where the beans come from, the harvest and roasting process, and how they are brewed. It's all about transparency, craftsmanship, and connection to the people behind the coffee, from the farmer to the barista, from bean to cup. Third wave

cafés often serve single-origin beans, offer pour-overs or other manual brewing methods, and prioritize education and quality over speed and convenience.

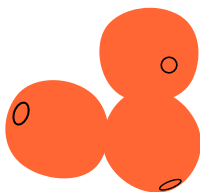

The Cola coffee club celebrates local cafés that are part of the specialty and third wave coffee scene because they offer something truly different: a deeper appreciation for coffee as an experience, not just a medium for caffeine!

By supporting these cafés, we're uplifting small businesses, encouraging ethical sourcing, and enjoying better-tasting coffee!

Where is the good coffee?
